

Enabler Fibre

HOW DO WE HELP YOU SUCCEED?

WWW.ENABLR.TECH

Unlimited reach, performance and diversity in your network.

Experience business-grade connectivity built for performance, reliability, and peace of mind. Enabler Fibre connects your business to the world through secure, redundant infrastructure — with single or dual fibre links, wireless and 5G APN failover access across MTN, Vodacom, and Telkom Mobile. Our network is protected in the core with built-in DDoS mitigation, backed by nine undersea cables and direct cloud peering for the lowest latency. It's connectivity designed not just to perform, but to empower your business every day.

We've mastered technology, so you don't have to.

Take the next step toward a smarter, more resilient network.

Partner with Enabler today and let our certified team help you unlock efficiency, win back time, and build certainty into your operations.

Performance

Experience Enabler Fibre in both Broadband and Dedicated Internet Access (DIA) formats, with true 1:1 contention for guaranteed bandwidth. Every connection comes with a static public IP address (with additional IPs available on request), ensuring seamless hosting, VPNs, and secure remote access.

Lower Costs

Enabler Fibre delivers business-grade performance at a lower total cost of ownership. Our service is designed to optimise bandwidth and reduce operational overheads, giving customers predictable costs and measurable value without compromising on quality.

Concierge

Connectivity is only part of the story — service is what sets us apart. With Enabler Fibre, customers gain access to a dedicated concierge experience, ensuring personalised support, proactive monitoring, and tailored solutions. From IP addressing options to hands-on guidance.

Benefits

- **Predictable Pricing:** Transparent costs with no hidden charges, making budgeting simple.
- **Reliable Service:** Managed connectivity with redundancy and high performance built in.
- **Security Built-In:** Real-time monitoring and DDoS protection across Enabler's core backbone.
- **Superior Experience:** Reduced latency through an IP backbone that keeps regional traffic local for faster, cost-effective continuity.
- **Always On:** A highly meshed, self-healing backbone ensures 99.9% availability.
- **Local Support, Global Reach:** End-to-end service from a single provider with local presence, multilingual support, and unified contracts and billing.

Features

- **Reliable Backbone:** High-speed, secure internet delivered via Enabler's optimised infrastructure.
- **Global Reach:** Connectivity to all five major subsea cables linking Africa worldwide.
- **Flexible Bandwidth:** Dedicated ports from 1 Mbps to 10 Gbps, with burst capability
- **Access Options:** Fibre, Microwave, APN and Satellite.
- **Scalable:** Easily upgrade bandwidth as employee count, offices, or traffic grows.
- **Future-Proof:** Full IPv4/IPv6 dual stack support.
- **SLAs:** Guaranteed performance on latency, packet loss, and uptime.
- **IP Addressing:** Public IP blocks available for hosting services.
- **CPE Options:** Customer Premises Equipment available with resilience safeguards.
