

Domain & Mail Security

HOW DO WE HELP YOU SUCCEED?

WWW.ENABLR.TECH

A resilient shield for your digital identity

Guardian Domain Protection ensures that every email sent under your brand is authentic, trusted, and delivered. By enforcing DMARC, SPF, and DKIM across all domains, Guardian Domain Protection eliminates impersonation, reduces phishing risk, and restores confidence in digital communications. With real-time visibility, automated enforcement, and expert support, Enabler helps organisations protect their reputation, secure customer trust, and meet compliance requirements.

Firewalls protect your perimeter, but email remains the most exploited attack vector. Guardian Domain Protection goes beyond configuration — it is designed,

implemented, and maintained by Enabler's Managed Services Specialists. You gain:

- 24/7 monitoring and incident response for domain impersonation attempts.
- Rapid enforcement of DMARC, SPF, and DKIM policies across all domains.
- Visibility dashboards showing who is sending email on your behalf.
- Proactive patching and updates to keep pace with evolving standards.
- On-site or remote support for seamless deployment and troubleshooting.

TECHNOLOGY AGNOSTIC

Enabler is brand-agnostic. Whether your organisation uses Microsoft 365, Google Workspace, or other mail platforms, Guardian Domain Protection integrates seamlessly. Customers retain existing investments while gaining the assurance of Enabler's managed services.

A SINGLE PANE OF GLASS, UNIFYING CONTROL

Guardian Domain Protection provides a unified dashboard for monitoring domain activity, policy enforcement, and compliance. This single pane of glass simplifies oversight, accelerates response, and builds confidence in email security.

Self/Co-Managed

Customers can retain hands-on control of rules and monitoring while benefiting from Enabler's specialists as an extension of their team. This model suits organisations that want visibility and influence over their domain and email policies but also value expert guidance.

Enabler Managed

For simplicity and certainty, Enabler offers a fully managed domain & email security service. Our certified staff take responsibility for implementation, monitoring, and ongoing optimisation — ensuring secure, high-performance protection across all environments.

At Enabler, we don't just configure DMARC — we design and maintain your domain protection strategy. By combining technical mastery with business empathy, Guardian Domain Protection delivers certainty every day.

Benefits

- Trust: Stop fake emails and protect brand reputation.
- Visibility: Gain actionable insights into domain usage worldwide.
- Delivery: Ensure legitimate emails reach inboxes, not spam folders.
- Compliance: Meet global standards (ISO 27001, GDPR, PCI-DSS, NIST CSF).
- Continuity: Reduce risk of fraud and business disruption.

Features

- DMARC, SPF, and DKIM enforcement
- Real-time reporting and analytics
- Automated policy deployment
- Lookalike domain defense
- Breach detection and dark web monitoring
- BIMI integration for brand visibility in inboxes
